

a first wall and a second wall;
at least one connection element coupling said first wall to said second
wall;
and a porous plate located adjacent to opposed edges of said first wall and
said second wall.

--2. (Amended) The module of claim 1, wherein the first and second wall
each have a rod located on a porous support plate ledge.

--3. (Amended) The module of claim 2, wherein the porous plate is
supported by said rod.

--4. (Amended) The module of claim 1, wherein the first and second wall
each have a ledge to support opposite sides of the porous plate.

--5. (Amended) The module of claim 4, comprising a rod disposed on each
ledge.

--6. (Amended) The module of claim 5 comprising an adhesive around the
rod to secure the porous plate to the ledge.

--7. (Amended) The module of claim 1, wherein the porous plate is secured
to the first and second walls by a restraining element.

--8. (Amended) The module of claim 1, further comprising a connection rod
for securing the first and second walls in a fixed position.

R E M A R K S

By this amendment claims 1-8 have been revised to eliminate minor informalities
and to conform the recitations therein to the terminology used in the specification.
